

# Your Cedar Wood Duck House Plan

## SAFETY TIPS:

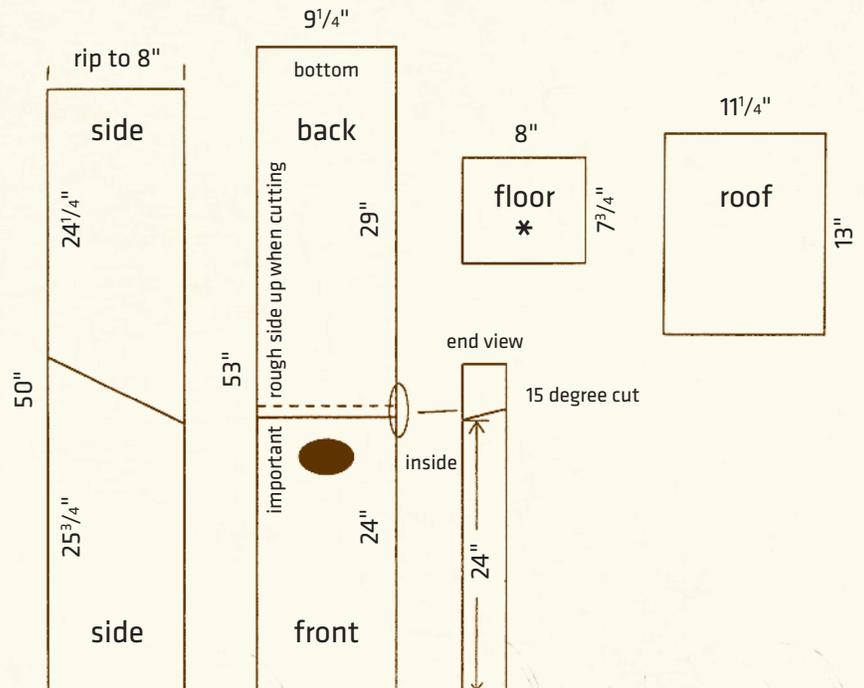

1. SAFETY GLASSES should be worn by EVERYONE in the woodworking area.
2. ADULTS should closely supervise the use of all tools. POWER SAWS should involve "hands on" adult supervision – if not actual COMPLETION BY AN ADULT.

## LUMBER:

1. Use "grade 3" cedar, rough one side.
2. Sides/front/back/floor – 1" x 10" (actual 3/4" x 9 1/4").
3. Roof – 1" x 12" (actual 3/4" x 11 1/4").
4. Rough surface goes OUT on completed house. (One "side" will be smooth unless you make an even number of houses and alternate the direction of your cross cut.)

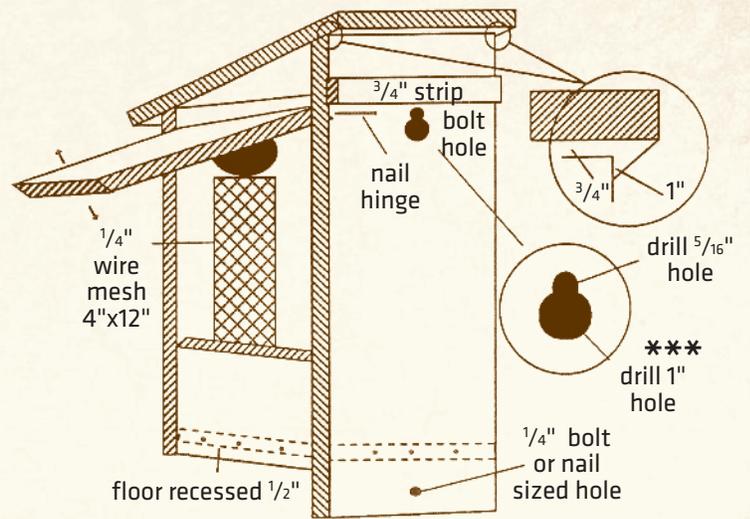

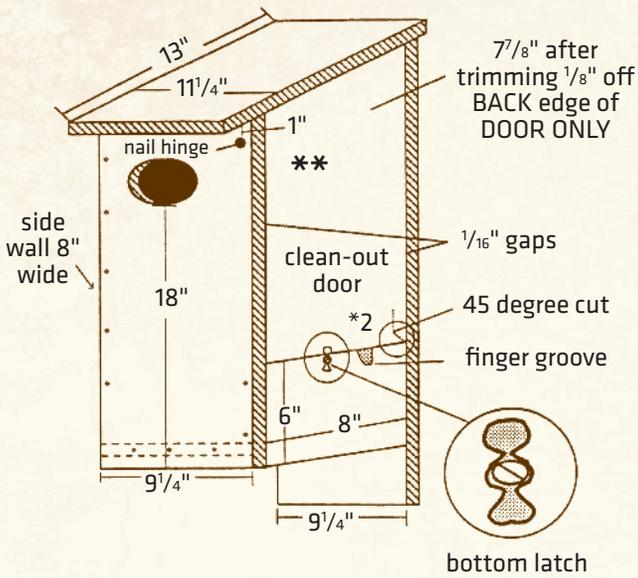

## DRAWING DETAILS:

\* Drain holes are NOT recommended in this house design.

## FINAL CONSIDERATIONS:

1. Have you attached your  $\frac{1}{4}$ " mesh EXIT LADDER?  
(A staple gun works great!)
2. Have you added 4" of cedar shavings as a nest  
base material?

## DRAWING DETAILS:

- \*\* Use a square to align rear "hinge nail" with front "hinge nail."
- \*\*\* Use a wood rasp to round out "finger groove" and trim "keyhole."
